

“Human-Like” Voice AI Agents

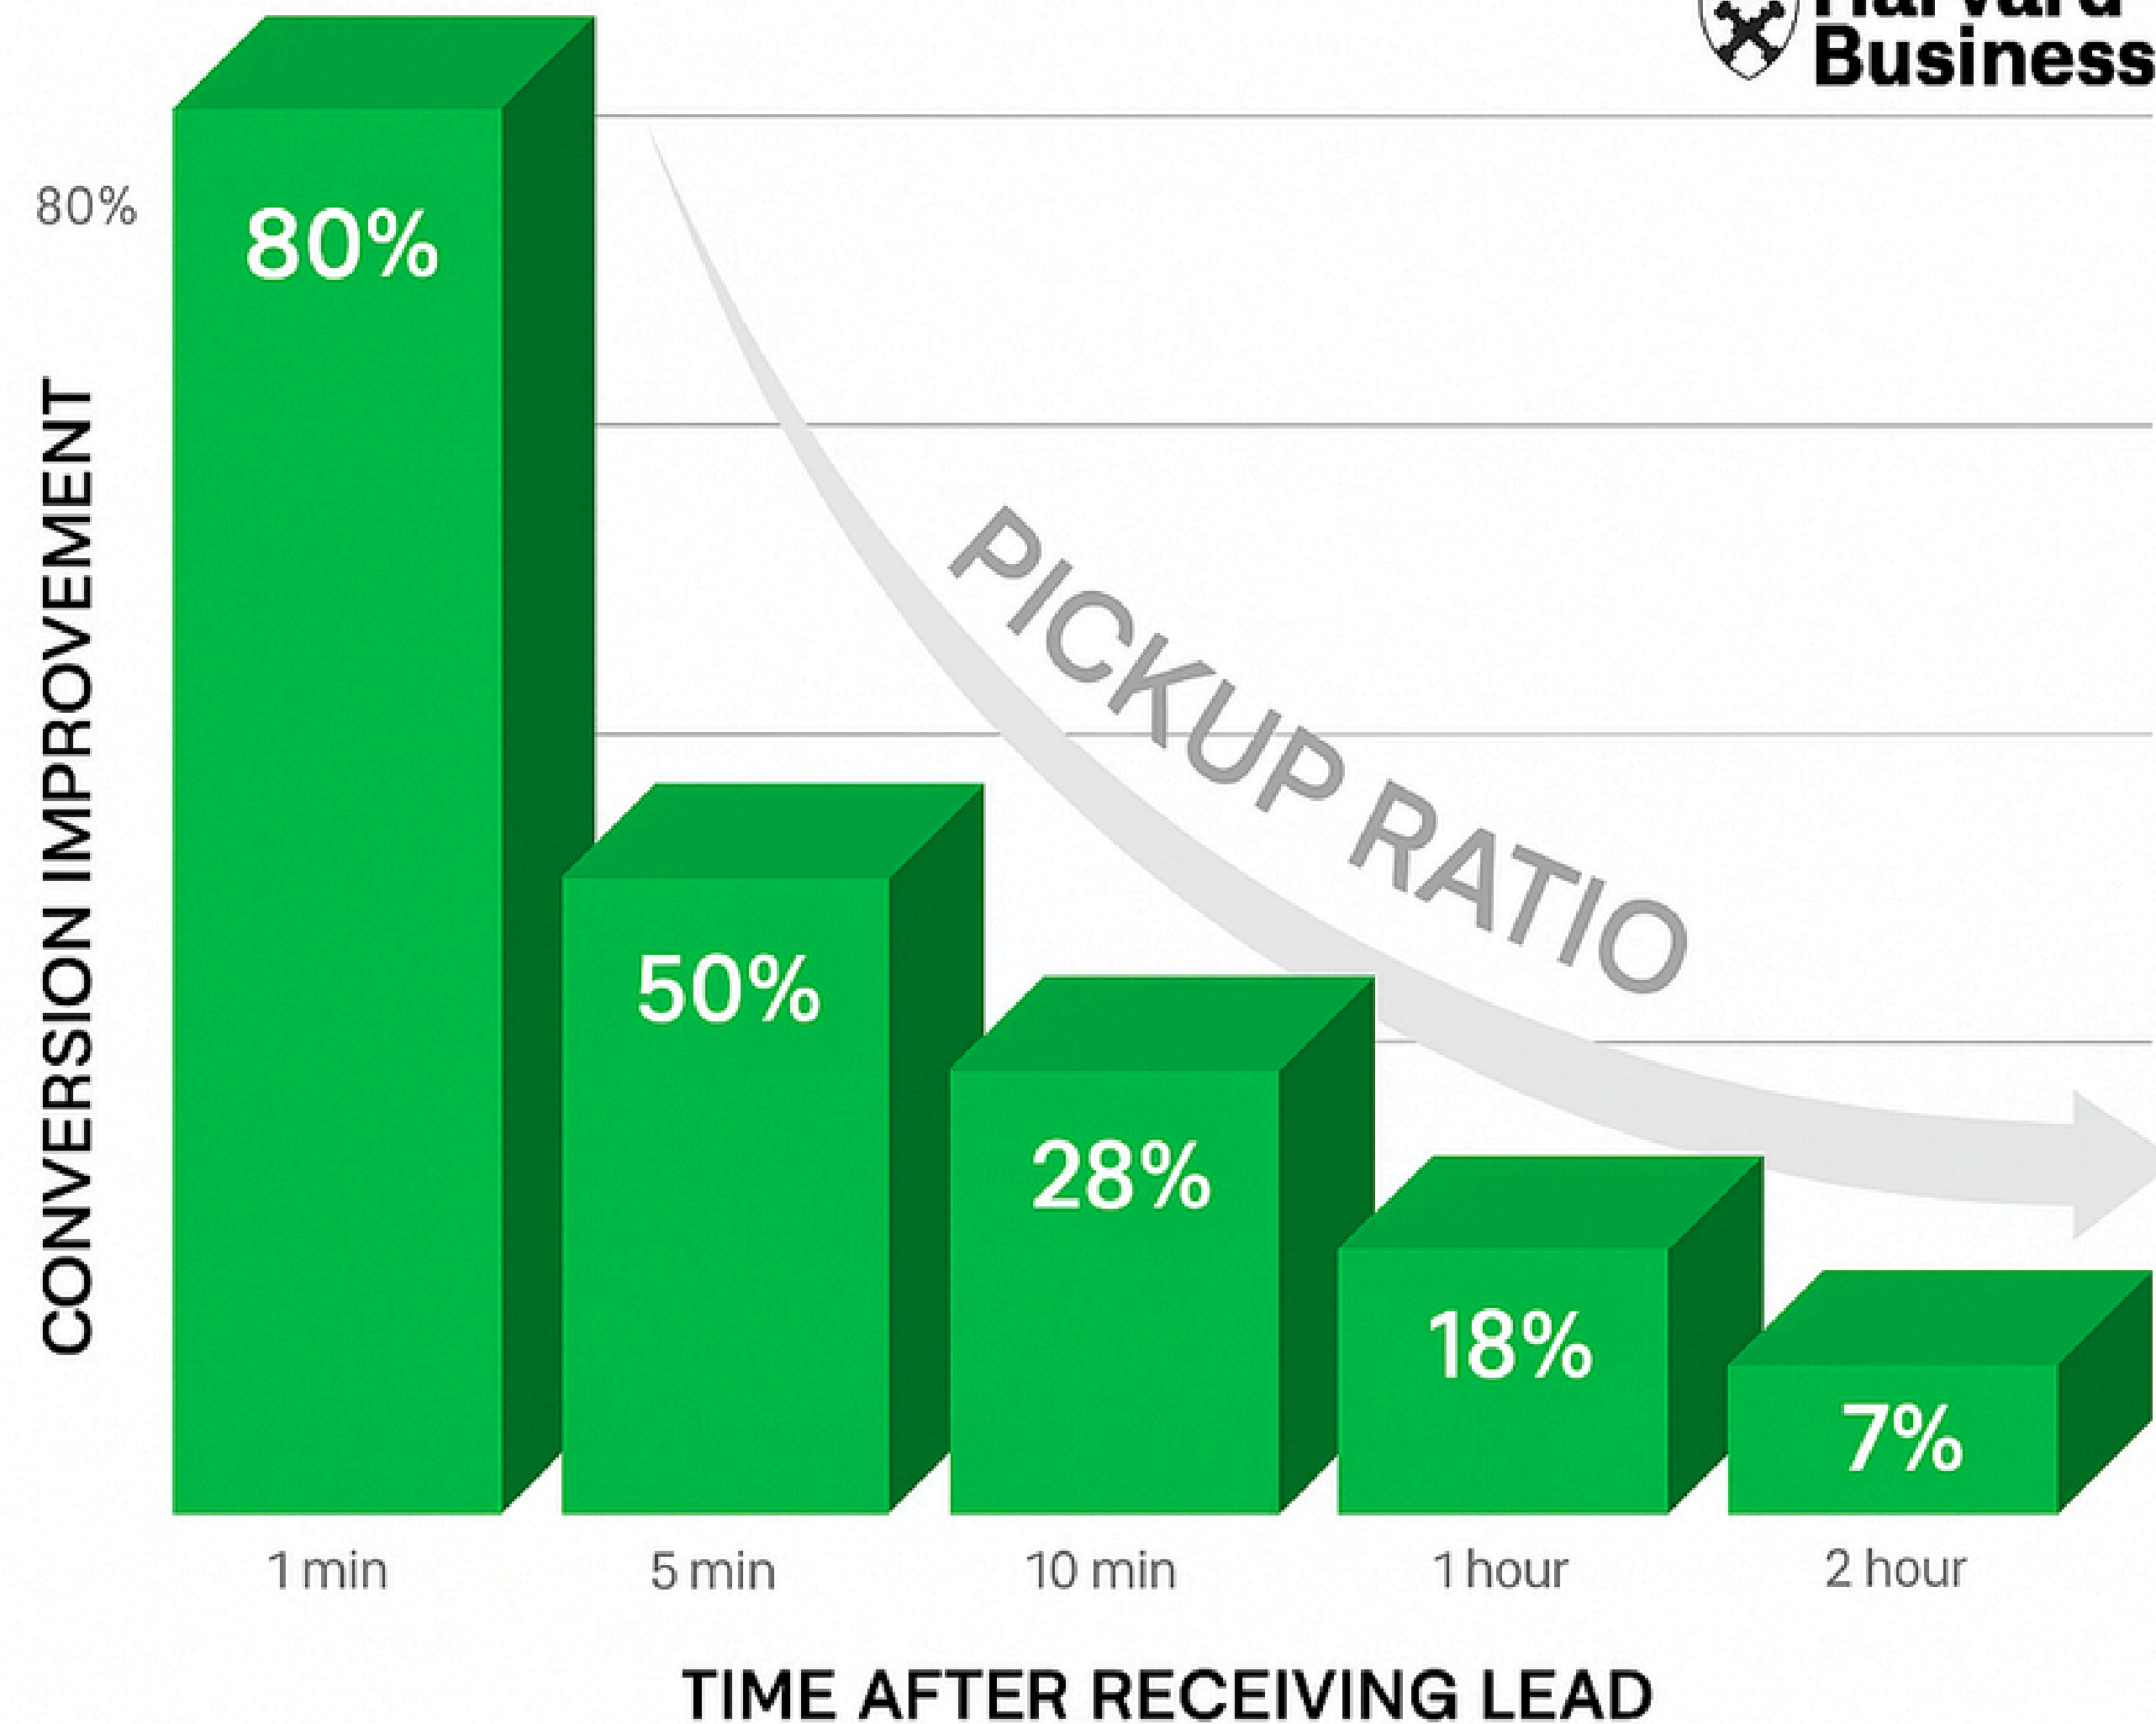

AI Agent to boost sales for Real Estate Agencies

Problem ?

Manual Dialing Is Killing Your Real Estate Conversions

Every minute you wait after a lead submits a form, your pickup rate drops sharply — from **80%** at 1 minute to just **7%** at 2 hours.

According to NAR (National Association of Realtors)

70% of real estate leads are never contacted a second time and **80%** of closings happen after **5+** follow-ups.

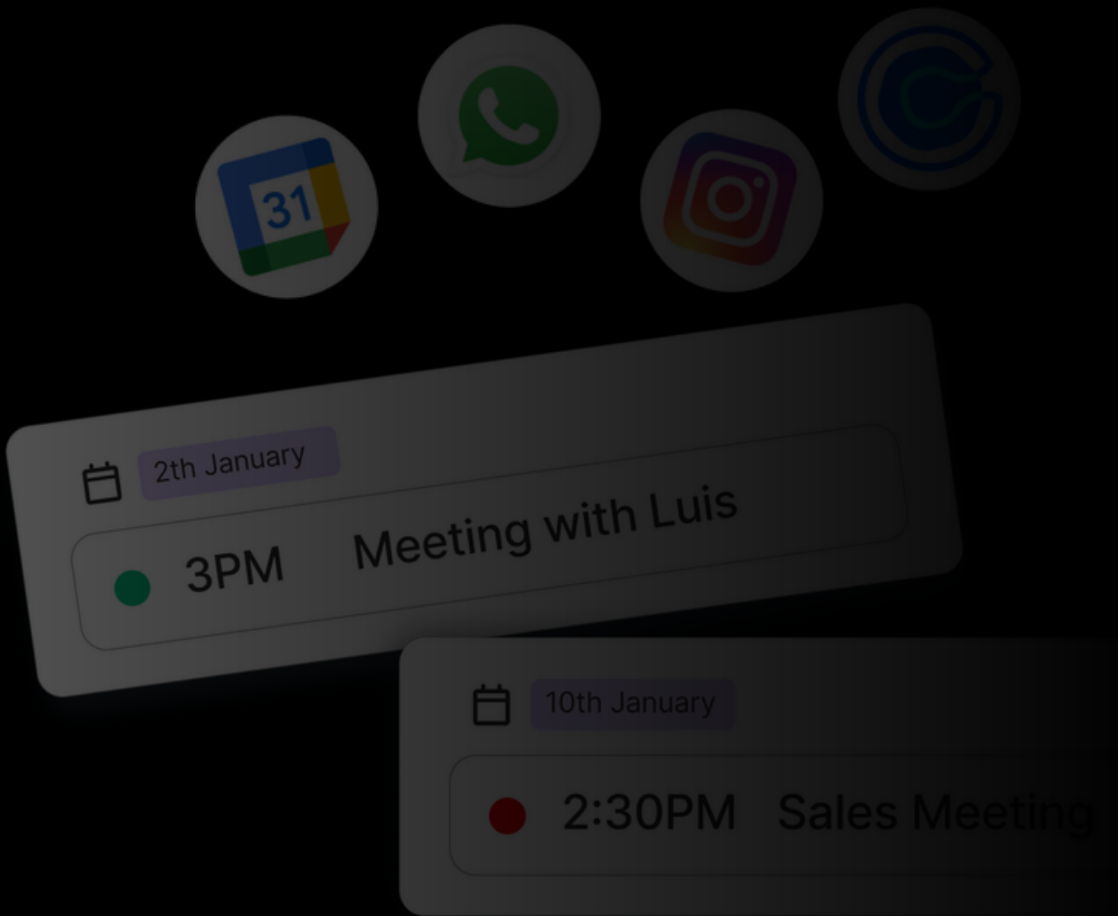

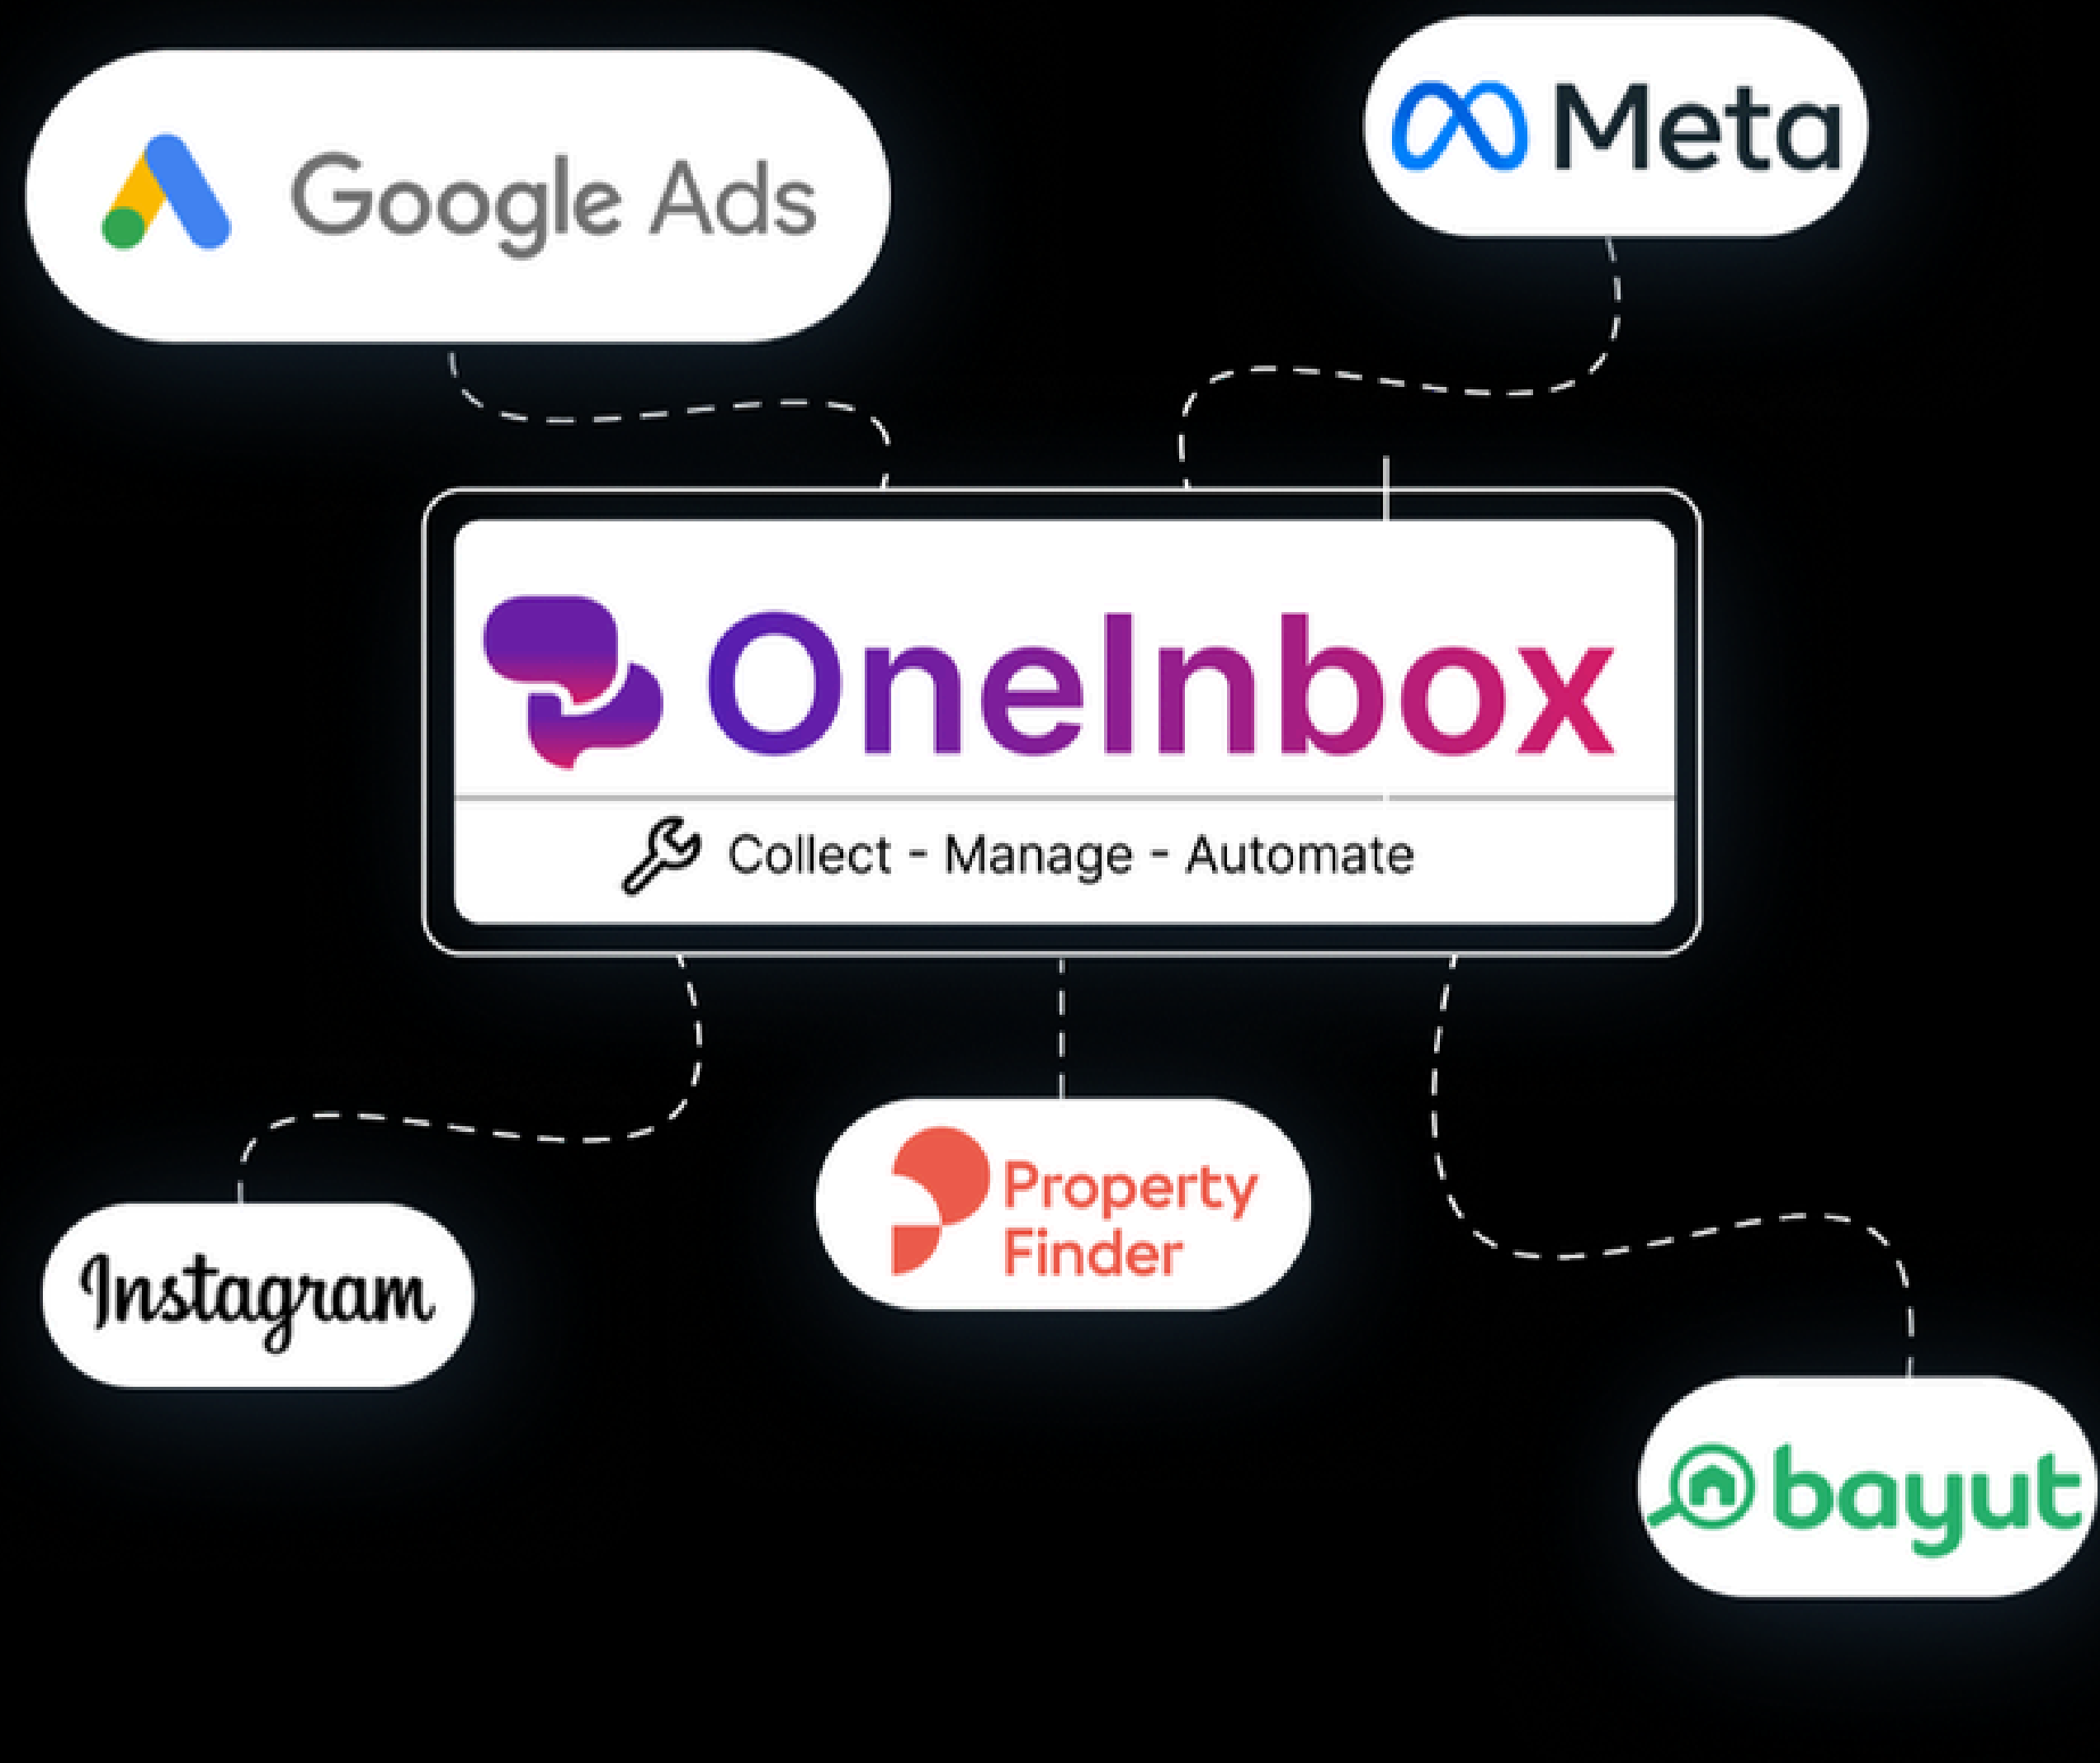

Real estate companies sit on thousands of leads...
But without enough agents or automation, these contacts go cold.

No follow-ups. **No** relationships. **No** deals.

Solution ?

Gather leads from multiple sources and call them back within minutes
